MAXIMIZE PROFITS

Stop pouring profits down the drain. Taylor's keg scale can assist with calculating liquor costs or used in conjunction with a more advanced liquor inventory system. Using a keg scale can hold bartenders accountable for selling every pour, wasting beer by pouring it out, handing out free beers, etc.

INVENTORY CONTROL

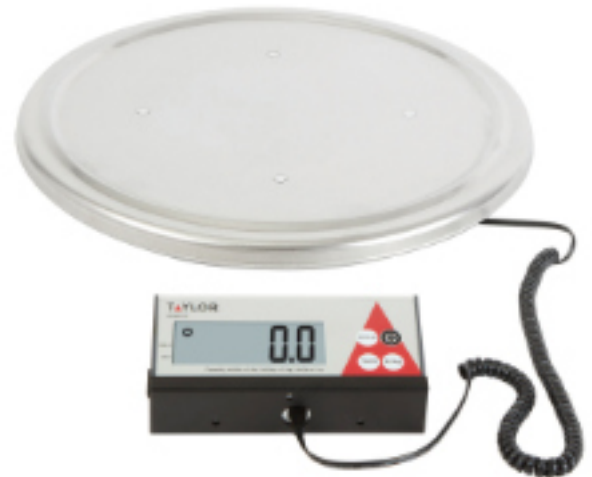

Weighing the keg is more accurate in determining fullness. Management can calculate the amount of beer poured not sold in comparison to draft beer sales in the POS system or register.

INVENTORY VERIFICATION

Weighing kegs allows management to determine the exact amount of beer they are receiving and effectively track draft beer usage.

EASY-TO-USE AND VERSATILE

Taylor's keg scale features a slim 1.5" profile which allows heavy kegs to easily slide on for measurement readings, no heavy lifting required. This can also be used as a receiving scale for food boxes to ensure what is delivered matches the invoice price.

SWING-A-WAY® Commercial Openers

Combining classic, time-tested design with modern innovation, Swing-A-Way® is the most trusted name in dependable, high-quality gadgets.

Since 1938, Swing-A-Way® has created the highest quality, most dependable can openers on the market. Thanks to a patented gear-driven cutting wheel, each opener requires less elbow grease to turn the crank, and the rubberized handles cushion your hands from what little work they're doing. Simple, classic, and well designed!
